## SUMMARY

Full Stack Developer and Software Engineer with hands-on experience building responsive, scalable web applications using Laravel, PHP, MySQL, JavaScript, Bootstrap, and Tailwind CSS. Experienced in developing real-world systems including college management platforms, task management systems, booking platforms, and QR-based attendance solutions. Completed all academic requirements for a BEng (Hons) in Software Engineering, currently awaiting final results and degree certification. Strong foundation in Agile fundamentals, problem solving, and modern web development practices, with a strong drive for continuous improvement.

CSS	Intermediate	MySQL	Intermediate
JavaScript	Intermediate	Vue	Basic
Bootstrap	Advanced	Git	Basic
Tailwind CSS	Intermediate	Problem Solving	Intermediate
PHP	Intermediate	Agile Fundamentals	Basic

## PROJECTS

---

### [JourneyJunction - Spa & Wellness Landing Page](#) | [Live Preview](#)

- This is a modern, responsive spa and wellness website landing page built using Bootstrap 5.3, Font Awesome, and AOS (Animate on Scroll).

### [ABC Horizon - College Management System](#)

- A modern, responsive, full-stack Laravel-based College Management System built for ABC Horizon university. This application handles student enrollment, grade management, program/subprogram structures, and administrative communication — all in one place.

### [Laravel Task Flow Manager](#)

- A Laravel 9 task management system featuring role-based access control for Admins, Managers, and Employees. Designed to streamline task assignment, tracking, and completion in an organization.

### [Laravel Blog Hub](#)

- A clean and elegant blog platform built with Laravel, featuring rich post management (create, edit, delete), AJAX-powered "Load More" pagination, visibility toggling for posts (active/inactive), and Bootstrap 5 styling. Designed to offer a smooth writing and reading experience.

### [ScanTrack](#)

- ScanTrack is a web-based attendance management system designed for universities. Students can check in to classes by scanning a QR code generated by the lecturer for each lecture. The system automatically tracks attendance, reducing manual effort for lecturers and minimizing fraudulent check-ins.

### [Simple Blog Template](#) | [Live Preview](#)

- A clean, responsive blog layout built with HTML and CSS. Ideal for beginners looking to learn how to structure a blog page or developers who need a starting point for a personal blog or portfolio site.

### [Tribute Page to Dr. Norman Borlaug](#) | [Live Preview](#)

- A simple and elegant HTML/CSS tribute page dedicated to Dr. Norman Borlaug, the Nobel Peace Prize laureate known as the father of the Green Revolution. He is credited with saving over a billion people from hunger through his groundbreaking work in agricultural science.

### BookMyHotel – Sustainable Hotel Booking Platform (Private Repo)

- BookMyHotel is a Laravel-based hotel reservation platform designed to support sustainable tourism by helping customers easily browse, compare, and book eco-friendly hotels. The system includes customer booking, hotel management, admin analytics, review & rating features, and sustainability reward tracking.

### Lectura – Virtual Learning Environment (Private Repo)

- Lectura is a web-based Virtual Learning Environment (VLE) designed to improve how educational institutions manage study materials, assignments, grading, and academic progress. Lectura provides a secure, role-based platform for students, teachers, parents, and administrators, ensuring organized access to learning resources while complying with modern data protection and privacy standards.

### Maillard – Restaurant Reservation System (Private Repo)

- A full-featured restaurant reservation web application built using Laravel 11, with role-based access for Admin and Customers. The system allows customers to reserve tables, receive reservation reminders, manage their profiles, and view a dynamic menu. Admins can manage reservations, tables, users, menu items, and send personalized messages.
